

Public Policy

Interdisciplinary

This concentration stresses the analysis and understanding of public-policy issues. Participants will learn how to apply the disciplines of economics and political science to analyze public-policy problems and to understand how public policy is formulated and implemented. Students begin by taking foundation courses in the two disciplines. The principles learned in these courses will then be applied to specific policy areas in the elective courses. The concentration culminates in an interdisciplinary capstone course focusing on the economic, moral, and political considerations entailed in analyzing and evaluating public policy and its purposes. In a typical program, a student would take ECON 101 and ECON 102 as a first- or second-year student, PSCI 310 in the sophomore year, 1.5 units of electives following these foundation courses, and the capstone course, PPOL 440, in the senior year.

FACULTY

John M. Elliott, Codirector, Professor of Political Science

William R. Melick, Codirector, Bruce L. Gensemer Professor of Economics

REQUIREMENTS OF THE PROGRAM

The concentration encompasses 3.5 units in economics and political science. All students are required to take the three foundation courses and the capstone course. The foundation courses are ECON 101 (Principles of Microeconomics and Public Policy), ECON 102 (Principles of Macroeconomics and International Trade), and PSCI 310 (Public Policy). The remaining 1.5 units will be selected from the electives designated as appropriate for the concentration. Economics majors must take at least 2 units in political science, and political science majors must take at least 2 units in economics, excluding the capstone course. Other majors must take at least 1.5 units in each department.

PUBLIC POLICY COURSE**PPOL 440/ECON 400. Senior Seminar in Public Policy**

Credit: .5 unit

This seminar brings together a political scientist and an economist to consider how these disciplines approach the study of public policy. The course will concentrate on applying both of the disciplines to the study of a selection of public policies ranging from poverty to budget deficits or globalization. We will explore the substantive issues and the process of governmental policy-making in specific policy domains. How is policy made? What should the policy be? The work of scholars in each discipline will be studied to better understand the differences in approaches and to consider the potential for combining them. What does political science contribute to the study of economic policy-making? What can the tools and perspective of economics contribute to the study of a topic like welfare reform or global warming? This seminar is required for students completing the Public Policy Concentration, and it is open to other seniors. Prerequisites: ECON 101, ECON 102, and one course in American politics, or permission of instructors.
