

Find network providers and compare quality and costs

Great news! Starting Dec. 21, your online services at **umr.com** will make it easy to look up UnitedHealthcare network providers and health care facilities and find cost estimates for different services – all in one place.

Health cost estimator
Or choose the “Health cost estimator” tile with the blue shopping cart. Both options will take you to a fully searchable directory of all the health care providers in your network.

Find a provider
To get started simply log in to your member account on umr.com and select “Find a provider” from the main menu.

The combined tool will help you see the amounts different providers charge for their services and how those amounts compare to the average costs in your area.

PLUS, you can see how different doctors have been rated for quality, and star ratings for customer satisfaction based on reviews from other patients.
