

Announcing an enhancement to the Kenyon dental insurance plan

Over the past several years, dental implants have proven to be functionally effective and durable. In many cases, dental implants have become the most logical choice for needed restoration. Accordingly, effective April 1, 2009, dental implants will be added to our dental plan as a covered service under the “Major Service” category. Coverage will be subject to the same provisions (including co-insurance, annual maximum and deductible) as other major dental services.

If you have any questions regarding this or other health/dental coverage, please contact Human Resources at ext. 5771 or EBMC at 1-877-304-0761.
